

TASK 1

Use Case Diagram Creation

Objective - Create a simple use case diagram for a library management system

A library management system is a software that helps manage the daily activities in a library like issuing books and managing members.

The two main actors in this system are -

- Librarian - the one who manages libraries operations.
- Members - the person who borrows books, returns them and may search for available books.

The use cases include -

For Librarian -

- Add book
- Remove book
- Checkout book

For member

- Search for book
- Check out book
- Return book
