

ASSIGNMENT 3

The image shows two screenshots of the GitHub web interface. The top screenshot displays the 'Create a new fork' form for the repository 'Wipro-Fork' by user 'mihir841'. The form includes fields for 'Owner' (Arushipriya) and 'Repository name' (Wipro-Fork1), with a confirmation that 'Wipro-Fork1 is available'. It also has a 'Description' field and a checkbox for 'Copy the main branch only'. The bottom screenshot shows the newly created forked repository 'Wipro-Fork1' by 'Arushipriya'. It indicates it was forked from 'mihir841/Wipro-Fork' and shows the repository's main branch, a single commit, and a README file. The right sidebar contains links for 'About', 'Releases', and 'Packages'.

Create a new fork

A fork is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project.

Required fields are marked with an asterisk (*).

Owner * Repository name *

Arushipriya / Wipro-Fork1

Wipro-Fork1 is available.

By default, forks are named the same as their upstream repository. You can customize the name to distinguish it further.

Description (optional)

☒ Copy the main branch only

Contribute back to mihir841/Wipro-Fork by adding your own branch. [Learn more](#).

New pull request

Welcome to pull requests!

Pull requests help you collaborate on code with other people. As pull requests are created, they'll appear here in a searchable and filterable list. To get started, you should [create a pull request](#).

ProTip!

Click a checkbox on the left to edit multiple issues at once.
